

REST IN HEAVEN.

Should sorrow o'er thy brow
In darkened shadows fling,
And hope that cheer thee now,
Die in their early spring;
Should pleasure at its birth
Fade like the hues of even,
Turn thou away from earth,
There's rest for thee in Heaven.

If ever life shall seem
To thee a toilsome way,
And gladness cease to beam
Upon its clouded day;
If like the wretched dove,
O'er shoulders ocean driven,
Raise thou thine eye above,
There's rest for thee in Heaven.

But Oh! if thoughtless flowers
Through thy pathway bloom,
And gaily feet the hours
Unstained by earthly gloom;
Still let not every thought
To this poor world be given,
Nor always let thy ken
Thy better rest in Heaven.

When sickness pales thy cheek
And dim the heavens eye,
And pulseless ocean driven,
Tell of a time to die;
Sweet hope shall whisper then—
"Though thou from earth be driven,
There's rest for thee in Heaven."
There's rest for thee in Heaven.

ANECDOTE.—The following anecdote, though very old is yet quite good, and we are not aware that it has ever been published. A clergyman who had considerable of a farm, was generally the case in our forefathers' days, went out to see one of his laborers, who was ploughing in the field, and found him sitting upon his plough, and resting himself. "John," said he, "would it not be a good plan for you to have a stub-scythe here and be hubbing a few bushes while the oxen are resting?" John made no reply, but with a countenance which might well become the divine himself, instantly returned—Would it not be well, for you to have a swinging board up in the pulpit, and when they are singing to swing a little flax? The Reverend turned on his heels and said no more about hubbing bushes.—*Northampton Gazette.*

A PROBABLE CASE.—A lawyer once in addressing the chancellor, found it necessary to illustrate his argument by supposing a case.—"Suppose," said the lawyer, "your honor should pick my pocket."—"Not a supposable case," replied the chancellor, "fidgeting on his seat, 'not a supposable case, sir.'"—"I beg pardon," returned the attorney. "We will alter the case; suppose I pick your pocket, sir."—"Ay, ay," replied his honor, "quite a probable case—quite probable—proceed, sir."

A LUCKY CLERK.—Of all the instances we have heard of persons attaining wealth by lucky accidents, none equal the following. A poor aged man, who had long earned his livelihood by knitting, one day coming to the end of her worsted ball, found it to be wound on a piece of an old newspaper, which she had the curiosity to read; when to her astonishment and delight, she discovered it to contain an advertisement respecting herself as the heir of a large property.

A POOR OF AN ARGUMENT.—The people of Cambray, France, when called upon to improve the cross roads, refused, saying their fathers before them had done without them.

COAL NOT NECESSARY FOR SMELTING IRON.—It will be unnecessary for our iron masters to trouble themselves about coal, if it is true that the late English mode of introducing a stream of heated air into the furnace, renders rough pit coal as good fuel as can be used.

RUSSIAN METALS.—Total amount of gold produced in Russia in 1835, 10,569 lbs.; of platinum, a metal of the Russian mountains, 4145 lbs.

A NATURAL CURIOSITY.—A sheep in the possession of Thomas W. Short, Esq. of Cambridgeport, has two pair of horns.

IMPORTANT TO ALIENS.—It is not generally known that at the last session of the Legislature of this State, an act was passed to enable resident aliens to hold and convey real estate, without restriction as to location or extent. It is to continue in force for five years only.—*Utica Observer.*

WE LEARN FROM THE NAVAL CHRONICLE that the command of the Exploring Expedition has been tendered to Captain Thos. Arctate Jones, and accepted. The Macedonian, now repairing at Norfolk will be the principal vessel in the service.

June 14, 1836.

KERN & EVANS
HAVE just received from New York, their spring supply of goods, comprising a choice selection of CLOTHS, CASSIMERES, VESTINGS, TRIMMINGS, &c. which with their former stock, makes their assortment the best they have ever offered. And notwithstanding the present unparalleled high prices of goods in market, our arrangements are such that we shall still be enabled to furnish our customers with very superior articles at a small advance from former prices for prompt pay.

We will make the present occasion also, to correct an erroneous impression, that we sell only to those who employ us to make their garments. This is entirely a mistake. Much as it might gratify us to do our friends justice in the fit, as well as the fabric, we shall nevertheless be equally happy to furnish the materials for those who may find it more convenient to employ other mechanics.
Burlington, May 12, 1836.

The Variety Shop.

At Burlington, Vermont, West side Church Street.

WE have received large additions to our Stock of **GOLD and SILVER** Watches, Chains, Keys, Pencils, Pins, ear Rings, Clocks, plated Ware, Britannia, Castors, brass and plated Candlesticks, Snuffers and Trays; plated knob Lamps; small go to bed Lamps, lamp Wicks and Glasses; baskets, bags and purses; military goods, perfumery, hair oil, shaving soaps, razors, leather brushes, pots, &c.; fine razor straps, fine cutlery, pen makers; an elegant assortment of fashionable stocks, collars and bosoms, accordeons, music boxes, small organs, and all kinds of musical instruments; hair, tooth and all kinds of brushes, visiting cards and cases, a great variety of sizes and colors; backgammon boards, chessmen, playing cards, quills, silver and steel pens; steel brass wood and whalebone busks, narrow whalebones, stay and boot lacings of cotton and silk, India rubber suspenders, patent and common elastic, flannels, needles and pins, thermometers, rosewood dressing cases, work boxes, portable desks, dressing cases for travellers, manifold writers, matches, pocket tinder boxes, dressing room mirrors, pocket and French mirrors, merchants' Tags, paints, brushes, pencils and all articles in that line; pictures, varnish and whitewood boxes, baskets &c. for transferring, fine engravings and prints for framing, &c.; miniature cases and sittings, pistols large and small, low and high priced, dirks and clasp knives, large and small telescopes or Spy Glasses; plaques of various patterns which are rapidly superseding waist buckles, powder horns and flasks, shot bags, table mats, slates, canes and umbrellas, together with a very large and elegant collection of fancy articles, some of which will be more particularly enumerated at some future time. To strangers visiting Burlington we would just say, that we have an assortment, selected with great care, which stands, we believe, unrivalled in these parts; and those wishing for fine Watches, Jewelry, or any Goods we sell, will save both time and money by calling at the Variety Shop, where Watches and Clocks are cleaned and repaired; silver Spoons are made and constantly kept for sale; Brands and Stamps cut at short notice; trunk and coffin Plates made when wanted.
PANGBORN & BRINEMAID.

NOTICE
To the inhabitants of Burlington & vicinity.
THE undersigned has rented the store formerly occupied by Wm. Wells, and the last year by David Irish, where he is now receiving from New York a general assortment of **DRY GOODS, WET and DRY GROCERIES, CROCKERY, GLASS and HARDWARE**, which he will sell for cash or most kinds of country produce as cheap as the cheapest.
He takes this opportunity to thank the public for the general support he has received for the short time he has been in business, and he hopes, by giving good bargains and paying strict attention to business, still to receive the same general support.

Dec. 35. J. & J. H. PECK & CO

IMPROVED Rotary Stoves.
THE subscriber has just received from the Foundry of J. D. Ward, Vergennes, No. 2 and 3

Rotary Cooking Stoves & Trimmings; Box do. Coldron Kettles, Ploughs, &c. &c.
which are offered for sale for cash or approved credit.

P. S. He wishes to call the attention of the economical, to the fuel and labor saving properties of the **Rotary Stove**, and its peculiar adaptation as a **Summer Cooking Stove**. By the use of the grate, a very small amount of fuel is required for the culinary operations of any family; less by one half, it is believed, than is required by any other Stove in use. Its form and height is such that it admits of being placed in the fire places of ordinary kitchens, so that most of the heat and effluvia from it passes off by the chimney. The saving of fuel effected by the Improved Rotary, in one year, over that of almost any other Cooking Stove, is fully equal to its cost, besides the superior facility and ease with which the several culinary operations are performed with it.

Also, Tea and Marlin Kettles of various sizes, cast expressly for this Stove.

March 23, 1836.

DOCT. WHICHER.
FORMERLY from Dover, N. H. takes this opportunity to inform his friends and the public that he has opened a **Botanic Infirmary** at the Green Mountain House, in Pearl Street, Burlington, Vermont, where he has fitted up rooms for the accommodation of the sick and infirm, and will practice in strict conformity to the system of Doct. Samuel Thomson of Boston, who has now become so celebrated, not only in the United States, but in Europe. "The Thomsonian System" has not only received the entire approbation of all who have tried its merits, but it has also received the unqualified approbation of many of the regular Practitioners. Doct. W. would beg leave to say to strangers, in regard to his qualifications, that he has spent three years diligently studying the principles of his profession, with Doct. Thomson and other distinguished practitioners that he has visited all the Infirmarys in New England, and can confidently offer himself to the public as well qualified to administer to the diseases of the sick, so far as preparatory studies and the best advantages for information, will enable him to do.

Mrs. Whicher having been at great pains to acquire information in Botanic practice, and having had two years experience in the profession with her husband, will take charge of the female department of the Infirmary.
Doct. W. in addition, would beg leave to report a number of cures performed under his own hand. First, the cure of William Walker of Franklin, N. H., who was entirely cured of the Rheumatism and Strangury in their worst stages, in the course of twelve days, after baffling the skill of all the learned doctors in the country.
Second, the case of Robert Salby, cured of a bad eye, in five days, after having been deprived of his sight for a very considerable time.
Third, the cure of Fidelia Elkins of Northfield, N. H., deprived of her reason seven years, was restored to it again after a treatment of eighteen days, and to perfect bodily health.
Fourth, the cure of Adeline Ham, had eyes for six years, exceedingly sore—entirely cured in five days.
Fifth, the cure of Mariba Scrutin, swollen neck, supposed to be King's-Evil—cured in five days.
Sixth, the cure of Mr. Maro. This was a case of Asthma, which had continued one year and was cured in four days.
Seventh, the cure of Sibil Watton, was a case of Dyspepsia, Rheumatism and Croup—cured in eight days.
Eight, the cure of Elmidea Quimby, cured of Consumption, after having been given over by all the doctors in the place.
Cure of Jacob Sawyer of Dover, N. H., cured of Dropsy and Fever Sores, seventeen years standing in four weeks.
The case of Amelia Whicher, after twenty years sickness of Dropsy, Dyspepsia and Paralytic shock, and of taking opium six years—was cured in twenty days.
Mr. W. has had two hundred patients and has given between four and five hundred courses for complaints of all descriptions, with mode of treatment has all the beneficial effects of a visit to the springs—while it saves the patient in many cases, an enormous expense.
Mr. W. would inform his friends that he has on hand a complete assortment of Botanic Medicines, from the hand of Doct. Samuel Thomson. That he has also family rights and Doct. Robinson's Bitters for sale.
Thomson of Boston, not Benjamin Thompson of Concord, N. H., nor Jesse Thompson of Mount Vernon Charles-street, Boston.
N. B. Patients should always have a change of linen when they put themselves under his care.

Burlington, May 12, 1836.

Botanic Infirmary.
Burlington, Vt.
DOCT. BENJAMIN THOMPSON, founder of the Concord Botanic Infirmary, feeling a deep interest in the cause of suffering humanity, and determined to use his utmost exertions to complete that reform in medical practice, which has already so gloriously commenced, has opened an **Infirmary** in the Mansion House, on Burlington square.

The unparalleled success which has attended his practice in New York, Boston and Concord, in which places he has had several thousand patients under his care, (more, probably, than any other practitioner in the civilized world in the same time,) will be a sufficient guaranty of the confidence of the intelligent citizens of Vermont. Those who are acquainted with the Thomsonian system of practice from personal knowledge, need no commendation of its truly wonderful virtues. "To such, (as says the venerable Dr. Benj. Waterhouse, for many years professor of Materia Medica in the University of Cambridge) it is the anchor of hope—the most invaluable of earthly blessings. But with those who have never had an opportunity of witnessing its health-preserving and restoring influence, it is the part of common sense and discretion, candidly to examine its claims, and not [as has too often been the case] condemn the Botanic Physician unseen and unheard."

Doct. Thompson, although he is unwilling to assume and defend the mal-practice which has characterized some of the pretensions of Thomsonian practitioners, seeks not to hide himself from public scrutiny, but solicits free and fair discussion, and a fair comparison of the Botanic with the Mineral practice. This course he has always desired, and has repeatedly, in his former communications to the public, challenged the regular physicians to a comparison of the merits of the two systems. He who candidly engages in the investigation of the system, will find its theory of disease simple, yet supported by sound reasoning—its practice based upon, and in accordance with that theory, simple yet effective, and the success that has attended it, wonderful beyond any thing which has preceded it in the history of medicine.

The Female Department of the Infirmary is constantly under the superintendence of a female, who is competent to perform all the duties assigned to that department.
No accounts will be opened. Payment must, in all cases, be made in advance.
N. B. A general assortment of genuine Botanic Medicine, for sale, together with several works on the Botanic System, which have not before been offered to the public, for which Doct. Thompson and his brother in Boston, are sole agents for the principal part of the New England States. Further particulars hereafter.

BENJAMIN THOMPSON,
Botanic Physician.
May, 1836.

June 17

Winooski Patent Block Manufacturing Company.
THE Directors of this Company respectfully inform their friends and the Maritine public of the United States generally, that they have purchased the whole of the establishment formerly known as the Livingston Patent Block Machinery, with all the extension of the patent rights recently granted by Congress to Thomas Blanchard, Esq., the original inventor and patentee, together with all the late improvements made and patented by him. They have manufactured and now offer for sale a large stock of machine made, solid, common and bushed Ship's Tackle Blocks, from 5 to 9 inches, and machine made Plank Blocks, from 7 to 16 inches, and other articles on reasonable terms.

They further inform the public that they have made arrangements for removing their machinery from New York to the site of a new mill with an 80 horse power water wheel built expressly to receive it, at Burlington, Vt. in the heart of a country abounding with the finest and best of timber for their purposes—whence they intend sending to the New York market a large, constant, and regular supply of these and other articles in the Block making line. They further add that it is their intention to increase the machinery so as to meet the present and future demands of the blockmaking trade and maritime public throughout the United States.

This Company has lately been incorporated by the State of Vermont with a large capital expressly for this purpose. A large discount will be allowed to the trade, and a liberal discount to ship chandlers and others. Orders addressed to William Serrell, superintendent at the company's office and store, No. 84 South street, N. York, will meet due attention. Burlington, 21st March, 1836.

J. & J. H. PECK & Co.
June 16, 1836.

DR. MARSHALL'S Aromatic & Head Ache CATARRH SNUFF.
THIS Snuff is superior to any thing yet known for removing that troublesome disease, the Catarrh, and also, a Cold in the head, and the Headache. It opens and purges out all obstructions, strengthens the glands, and gives a free healthy action to the parts affected. It is perfectly free from any thing deleterious in its composition—has a pleasant flavor, and its immediate effect, after being used, is agreeable. Price 50 cts per bottle.

Dr. Marshall's Vegetable Indian Bark PLASTER.
THIS Plaster is unrivalled for curing Scrofulous Swellings, Scurvy Sores, Lame Back, Fresh Wounds, Pains in the Sides, Hips and Limbs; and seldom fails to give relief in all local Rheumatisms; it is equal if not superior to any Corn Plaster for Corns on the feet. If applied to the Side it will cure many of the common Liver complaints, and if applied to the neck in season will cure the Quinsy. The virtues of the Plaster have been witnessed by thousands of the most respectable individuals in the States of Vermont and New York, who have tested its efficacy. Price 25 cts per box. None genuine unless signed by John Marshall, in his own hand writing, on the wrapper.

Sold Wholesale and Retail by the Proprietor, CHARLES BOWEN, Middlebury, Vt.; also by J. & J. H. PECK & Co., H. W. POTWIN & Co., and WOOD & Abbott.

Compound Syrup ICELAND MOSS.
For the cure of Colds, Asthma, Whooping Cough, spitting of Blood and Consumptions.

ICELAND MOSS grows plentifully in the Island of Iceland, from whence it takes its name, and is all the high northern latitudes of Europe and Asia, where its medicinal qualities have been long known, and highly appreciated. This plant contains a large proportion of **Vegetable Mucilage** than any other known substance, and in combination with it is a bitter principle which acts most beneficially in giving strength in cases of great weakness and debility of the lungs. The knowledge of many of our most valuable medicines, for the cure of diseases, have been obtained from observing their effect on brute animals;—so in the case of this most invaluable Moss. Its virtues were first discovered by their effects on the hardy, long-lived and sagacious Rain Deer, which derives its principal nourishment from the Iceland Moss, and whose milk becomes so highly imbued with its Balsamic virtues, that it is used with the greatest confidence as a sovereign remedy for the inhabitants of all those countries for the cure of all diseases of the breast and lungs. In France, this compound has long been known, and extensively used; and to its salutary effects as much as to the salubrity of the climate, is probably owing the very small number of fatal cases of consumption in that country, compared with Great Britain and the United States. This Syrup contains all the medicinal virtues of the Moss in the most concentrated form, and is prepared from the original receipt from Paris, only by

E. HUTCHINGS & CO, Baltimore
And none is genuine unless it has their facsimile upon each bill of direction also upon the envelope, and sealed with their seal.

A VALUABLE SALVE
FOR Wounds, Bruises, or Sores of and kind, even those which have long been troublesome; an immediate cure for Burns of Scalds, Salt Rheum, Chapped Hands, and the best thing that I have ever known, used for Sore Eyes. It is also good for the St. Anthony's Fire or Ictericus. I had a child very much afflicted with it; I applied many things, but to no effect until I made use of my Salve, which cured her in one day by rubbing it on the parts affected. In fact it may be used for every thing of a sore nature to good effect and with perfect safety, and no family ought to be without it. It would be found very useful on board of Steam Boats, or vessels of any kind, where accidents may happen; especially such as Scalds or Burns, for where applied, draws out the pain immediately and heals the wound quicker than any thing else I ever knew used. In case of sickness, where persons are under the necessity to have blisters drawn, this Salve is the best application which can be made after the fires are removed. If you wish to have it draw much spread the plaster thick; if to heal immediately, spread it very thin on linen; you need no other application. Prepared and sold by J. RUTHERFORD, Burlington, Vt. Price 1-2 cents per cake.

This may certify to all that it may concern, that I have for about two years past, made use of A. Rutherford's heal all Salve, in my family, and I consider it preferable to any salve I have ever known manufactured; its utility will apply to fresh wounds, old sores, sore eyes, scalds and burns.
ELWOOD LANS.

I do hereby certify that I have made use of A. Rutherford's Salve for nearly two years, and I never found any thing ever equalled it for a burn or scald, or a fresh wound; and for sore eyes there is nothing that ever I tried which will restore the eyes to their natural state in so short a time as this Salve. I do therefore recommend it for the benefit of mankind.
JOHN LOGAN.
Burlington, May, 1836.

The subscriber hereby certifies that for more than a year past, in cases of wounds and bruises, he has frequently made use of and experienced the salutary effects of A. Rutherford's salve, and has also witnessed the same in others, and has cheerfully recommended it as a valuable salve.
E. W. SPEAR,
Skeburn, May, 1836.

We the undersigned have used A. Rutherford's salve for more than a year, and have known others to use it, and can recommend it to be the best thing we ever knew for burns, scalds, fresh wounds, bruises, or old sores of any kind; and we further recommend it to be superior to any thing else, for sore eyes; and we do think A. Rutherford's salve ought to be more publicly known for the benefit of mankind at large.
NATHANIEL HOWARD, F. W. GRIEWOOD, LUCIUS HENDRICK.
Vergennes, May, 1836. 6m June
